RESUME OF MIN KHANT THAW

Working Experiences

The following projects are my personal projects.

1. School Management System (December 2022)

A web application, it was built by using PHP, Laravel, Bootstrap and MySQL database.

https://github.com/mkthaw14/school_management_system

2. Ecommerce Online Shopping (September - November 2022)

An ecommerce shop, as a part of my bootcamp assignment, was written in Java Spring by using Spring Web, Spring Data JPA, MYSQL database. This project was built using a combination of both MVC and REST API architectures.

October - November 2022

- Implemented chat messaging system by using Simple Text Oriented Messaging Protocol (STOMP). So that customers can communicate with site admin.

September 2022

- Implemented REST API for showing data summary in dashboard.

- Implemented login and logout system by using Spring Security to be more secure.

- Implemented CRUD for category, product, order, user by using Spring data JPA and MySQL database
