Japanese(N3)	No	No

Project Experiences

1. Ecommerce Online Shopping (August- September)
   An ecommerce shop, as a part of my bootcamp assignment, was written in Java Spring by using Spring Web, Spring Data JPA, MYSQL database. This project was built using a combination of both MVC and REST API architectures.

   October - November 2022
   -Implemented chat messaging system by using Simple Text Oriented Messaging Protocol (STOMP). So that customers can communicate with site admin.

   September 2022
   -Implemented REST API for showing data summary in dashboard.
   -Implemented login and logout system by using Spring Security to be more secure.

August - September 2022
-Implemented CRUD for category, product, order, user by using Spring data JPA and MySQL database
https://github.com/mkthaw14/spring-ecommerce-shop-app

2. Library Management System (March 2022)
   A desktop app, it was built by using Java, JavaFx and JDBC for connecting MySQL database.
